Chief, []

Request for USAFE ELINT Training Materials

1. We are currently actively pursuing a program for improvement in our ELINT training courses, particularly those suitable for briefing of laymen not having had previous technical background in their education and experience.

2. Based on a recent experience by [] during his TDY to Germany, he reports that [] of the 6901st at Saarbrucken has developed a "Road Show" presentation which is very effective for briefing laymen on the complex ELINT and reconnaissance functions. As described to us, a system has been developed whereby two lecturers are equipped with picture presentations one representing tactical operations involving electronic devices and the other presenting the counter measure solution for the type of electronic tactical device.

3. In view of this, it would be appreciated if at some time, when convenient, [] will make contact with [] to determine whether or not a script and the graphic aids could be obtained for use in our training program here at Headquarters.
